WORK EXPERIENCE

Melham Construction Company   **August 2022 - September 2022**
Lead Back End Developer Intern

- Led a team in developing, enhancing, and maintaining the backend of the offboarding system assigned to our team using PHP, JavaScript, and MySQL, while also monitoring the database for optimization opportunities.
- Organized meetings to establish timelines, resolve issued, and prioritize tasks for meeting deadlines, leveraging Discord for both meetings and message.
- Managed system version control through FileZilla, ensuring seamless collaboration and tracking of code changes.

PADES Printing   **October 2023 - November 2023**
Freelance Developer

- Collaborated in the design process of a static responsive website using Figma, contributing to both low-fi layout and high-fi UI design.
- Contributed to the development of a fully responsive business website using HTML5, CSS3, React.JS, and Bootstrap within a team environment, while utilizing Git for version control.
- Hosted the website on GitHub Pages with a domain from Hostinger, and participated in project management using Jira and Slack for effective coordination and communication.

EDUCATION

Zuitt Web Developer Program   **March 2024 - May 2024**
Main Course Package (MERN) - Full-stack Web Development

BS in Computer Engineering   **June 2019 - September 2023**
Polytechnic University of the Philippines, Sta. Mesa, Manila

PROJECT EXPERIENCE

Personal Portfolio (Capstone Project): Designed and developed a static responsive portfolio website using HTML5, CSS3, Bootstrap, and Git for version control, hosted on GitHub.

E-Commerce Application with API Integration (Capstone Project): Created an ECommerce Back-end API using Node.JS, Express.JS, and MongoDB for database, utilized Postman for API testing, deployed on Render. Designed and developed a React-based web application with API Integration and responsive design, utilizing modern JavaScript techniques and DOM manipulation for enhanced user experience.

PADES Printing Business Website: Design and developed a static responsive business web application for a small business using React.JS, CSS3, Bootstrap, and Git for version control, hosted on GitHub, and deployed on Hostinger.
